Currently Viewing: School Assessment >> MMR Vaccination >> All kindergartners >> Coverage for 2016-17

Data Notes and Footnotes

Abbreviations: MMR: measles, mumps, and rubella vaccine; DTaP/DT: diphtheria and tetanus toxoids and acellular pertussis vaccine; HepB: Hepatitis B; Polio: Poliovirus; NA: not available; NReq: not required for school entry.

Data Notes:

- Data for the 2010-11 school year were not verified.
- In 2009-10 and 2011-12, data were weighted on the population if awardee submitted reports for <95% of enrolled students. Other years, estimates were adjusted for non-response and weighted for sampling as

Legend(%)

- 85.6 - 91.5
- 91.6 - 93.8
- 93.9 - 95.1
- 95.2 - 96.7
- 96.8 - 99.4
- NA

Data notes and footnotes: Scroll to see an interactive display with abbreviations, data notes, and footnotes describing the data.

Legend: Scroll over the top right corner and click on the gear symbol to customize the legend. You can customize the display color, number of classes, and direction of classes.

Data table: Click the title to toggle between state and national estimates. Highlight an area in the data table to select it. The area will highlight on the map and bar chart.

Map: Click an area on the map to select it. The area will highlight on the bar chart and data table. Hover over the area to see the area name and estimate.

Coverage Dashboard SchoolVaxView

Filter tool: Click to toggle between state/local area and HHS Region.

Data notes and footnotes: Click to see an interactive display with abbreviations, data notes, and footnotes describing the data. To close, hover the cursor in the upper right area and click on the X.

State or US Median Tables: Select an area or multiple areas in these tables to populate the dashboard. To clear an individual area, click the highlighted area. To clear all areas selected, click the clear button at the bottom of the table.

Dashboard: Data for each selected area include vaccine, sample size (n), population size (N), percent surveyed, estimate (%), footnotes, and survey type. Progress toward Healthy People 2020 shows the estimate (%) as a horizontal bar with the Healthy People 2020 target as a red vertical line. If there is no red vertical line, a Healthy People 2020 target does not exist.

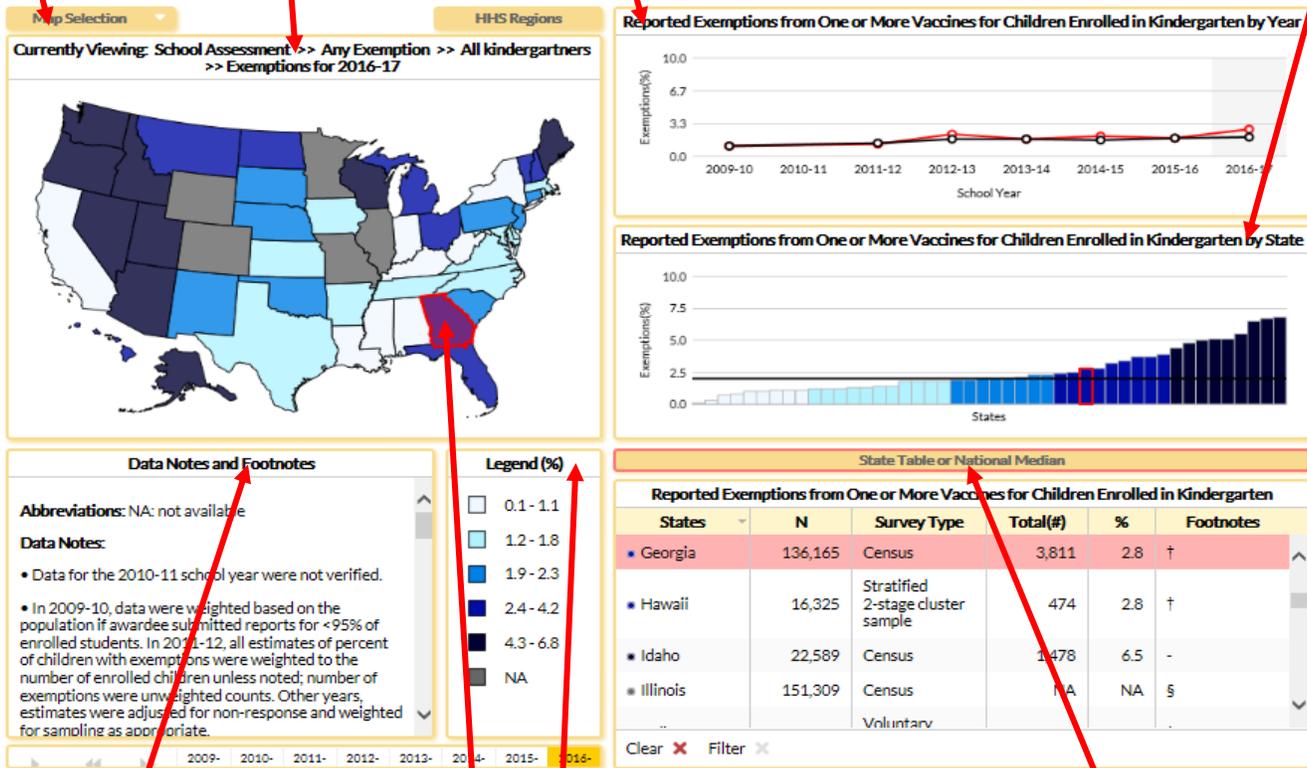

Trend and Single-Year Exemption Report SchoolVaxView

Map selection tool: Click to choose the exemption type and school year. You must choose the school year to see the data.

Trend line graph: Hover over a data point to see the area name, estimate, and year. The single-year map does not include the trend graph.

Map title: Describes the exemption type and school year currently being viewed.

Bar graph: Click a bar to select an area on the bar chart. The area will be highlighted on the map, line graph, and data table. Hover over the bar to see the area name and exemption estimate.

Data notes and footnotes: Scroll to see an interactive display with abbreviations, data notes, and footnotes describing the data.

Legend: Scroll over the top right corner and click on the gear symbol to customize the legend. You can customize the display color, number of classes, and direction of classes.

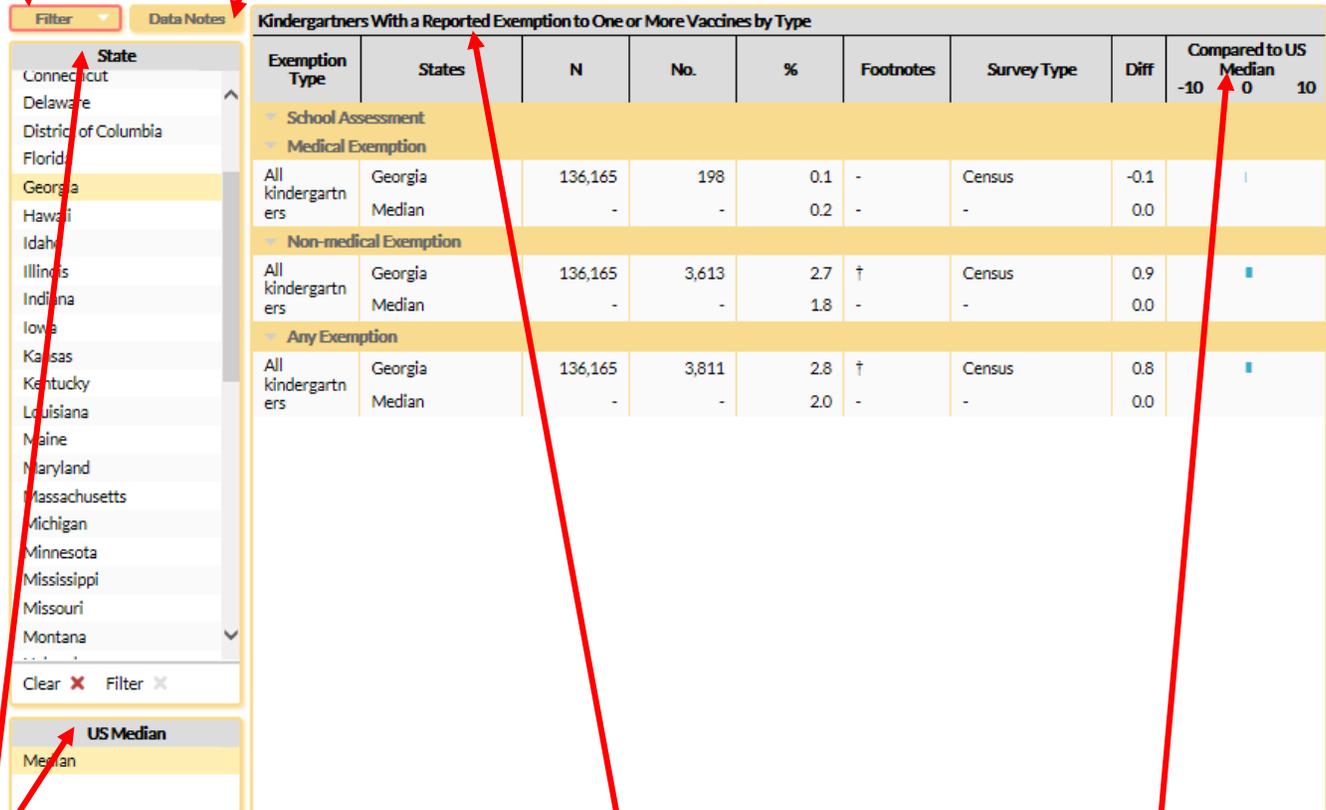

Data table: Click the title to toggle between state and national estimates. Highlight an area to select it on the data table. The area will highlight on the map and bar chart.

Map: Click an area on the map to select it. The area will highlight on the bar chart and data table. Hover over the area to see the area name and exemption estimate.

Exemption Dashboard SchoolVaxView

Filter tool: Click to toggle between state/local area and HHS Region.

Data notes and footnotes: Click to see an interactive display with abbreviations, data notes, and footnotes describing the data. To close, hover the cursor in the upper right area and click on the X.

State or US Median Tables: Select an area or multiple areas in these tables to populate the dashboard. To clear an individual area, click the highlighted area. To clear all areas selected, click the clear button at the bottom of the table.

Dashboard: Data for each selected area include exemption type, population size (N), number with the exemption (No.), estimate (%), footnotes, and survey type. Comparison to US Median shows the estimate (%) as a horizontal bar with the US Median as a blue vertical line.
