As opportunities for in-person learning and play grow, it’s important for your child to catch up on checkups and recommended vaccines to protect their health now and in the future.

The Centers for Disease Control and Prevention (CDC) recommends children continue to see their doctor for regular checkups and routinely recommended vaccinations, even during COVID-19.

WELL-CHILD CHECKUPS ARE ESSENTIAL

• The doctor tracks your child's growth and development
• You can ask the doctor questions about your child's health
• Your child gets recommended vaccinations

VACCINATION HELPS PROTECT YOUR CHILD’S HEALTH

• Routine vaccinations during childhood help prevent 14 diseases
• Among children born from 1994-2018, vaccinations will prevent an estimated 936,000 early deaths, 8 million hospitalizations, and 419 million illnesses

Doctors can safely see your child, even during the pandemic.

Talk with your child’s doctor about staying up to date on regular checkups and routinely recommended vaccinations.
