Hashtag Vaccines By The Numbers.

Graphic of germs and band-aid appears around text. Germs disappear after band-aid appears.

New pneumococcal vaccines were introduced in 2000 and 2010.

Line graphic from 1999 to 2015 showing a decline from 1999 to 2015.

Since then, they have helped slash the estimated number of cases of invasive pneumococcal disease (bloodstream infections and meningitis) in young children by almost 90%.

Graphic of magnifying glass looking at squirming germs.

Despite this, outbreaks still happen. Vaccines can help protect your child from 14 serious diseases by age 2.
