CoCASA Changes from Version 11.0 to 12.0

CoCASA Enhancements

1. Updated the HPV algorithm such that if the first dose is given at less than 15 years of age only two doses are required, otherwise three doses are required.
2. All links to CDC web sites where changed from http:// to https:// protocols.
3. The import complete message was enhanced to be clearer.
4. The import error logs are now saved and can be accessed via a menu item under Utilities.
5. The user's import template is no longer automatically overwritten when an import is performed. The user now has to option to save or not save the template.
6. All references to old VFC reports have been removed.
