

Do the parents of your
preteen and teen patients
know more about when to get
their oil changed than when
their kids are due for vaccines?

Parents trust your opinion more than anyone else's when it comes to immunizations. **Use every opportunity** to vaccinate your adolescent patients. Ask about vaccination status when they come in for sick visits and sports physicals.

We all need a 'sticky note': **patient reminder and recall systems** such as automated postcards, phone calls, and text messages are effective tools for increasing office visits and keeping up with vaccination series.
