<b>Total</b>	<b>486</b>	<b>226</b>	<b>712</b>	<b>43</b>	<b>137</b>

\*Includes cases reported as meningitis, encephalitis, or acute flaccid paralysis.

†Includes confirmed and probable cases.

‡Presumptive viremic blood donors (PVDs) are people who had no symptoms at the time of donating blood through a blood collection agency, but whose blood tested positive when screened for the presence of West Nile virus. Some PVDs develop symptoms after donation; of the 137 PVDs, 33 (24%) developed clinical illness and are also included as disease cases.
