Advances in Screening and Treatment for WTC Responders and Survivors

Supported by a contract from the Centers for Disease Control and Prevention

Contract 200-2014-P-6 896 / GS02F0034W

June-July 2016 CME Metrics

1. After the 9/11 Terrorist Attacks: The World Trade Center Health Program and Disaster Response CME/CE

Leigh R. Wilson, DO, MPH; Laurie I. Breyer, JD, MA, Dori Reissman, MD CME/CE Released: 06/19/2015; Valid for credit through 06/19/2016

This activity is intended for clinicians with patients involved in specific activities or at specific locations on 9/11 and the weeks and months that followed.

The goal of this activity is to inform clinicians about environmental exposures on 9/11 and the World Trade Center (WTC) Health Program.

Upon completion of this activity, participants will be able to:

- Identify patients who are eligible for care under the WTC Health Program
- Identify exposure-related health risks associated with environmental exposures from the WTC site
- Describe the lessons learned from the 9/11 disaster response

Credits Available

Physicians - maximum of 0.50 AMA PRA Category 1 Credit(s)™

Nurses - 0.50 ANCC Contact Hour(s) (0 contact hours are in the area of pharmacology)

2. Health Risks Associated with 9/11 and the WTC Disaster: Lessons Learned

Iris G. Udasin, MD; Denise Harrison, MD; Paul Park, PsyD; Laurie I. Breyer, JD, MA CME/CE Released: 06/24/2015; Valid for credit through 06/24/2016

This activity is intended for clinicians who have or may encounter patients who were exposed to environmental hazards on 9/11.

The goal of this activity is to explain the environmental hazards associated with the 9/11 attacks and provide information about the World Trade Center Health Program.

Upon completion of this activity, participants will be able to:

- Identify immediate, short- and long-term health risks posed by exposure to disaster and/or terrorist attacks to responders and survivors
- Identify comorbidities most common in survivors and responders to the 9/11 World Trade Center, Pentagon, and Shanksville, Pennsylvania.

Credits Available

Physicians - maximum of 0.75 AMA PRA Category 1 Credit(s)™

Nurses - 0.75 ANCC Contact Hour(s) (0 contact hours are in the area of pharmacology)

3. Advances in the Screening and Treatment for WTC Responders and Survivors

Jacqueline Moline, MD, MSc CME/CE Released: 08/28/2015; Valid for credit through 08/28/2016

This activity is intended for nurses, primary care physicians, pulmonologists, and neurologists.

The goal of this activity is to explain what we have learned about disaster response and the medical and mental health effects of environmental exposures, particularly 9/11.

Upon completion of this activity, participants will be able to:

- Identify types of environmental exposures that can affect health following a disaster or terrorist attack
- Summarize ways in which environmental exposure science can inform public health policy before and after disaster
- Identify immediate and long-term health needs of exposed populations following a disaster, using lessons learned from the WTC Health Program population

Credits Available

Physicians - maximum of 0.25 AMA PRA Category 1 Credit(s)™

Nurses - 0.25 ANCC Contact Hour(s) (0.25 contact hours are in the area of pharmacology)

4. Airway, Digestive, and Mental Health Comorbidities in WTC Responders and Survivors

Nomi Levy-Carrick, MD, MPhil; Michael Crane, MD, MPH; David Prezant, MD; Joan Reibman, MD

CME/CE Released: 08/26/2015; Valid for credit through 08/26/2016

This activity is intended for clinicians who treat or may identify in their practice patients who are 9/11 responders or survivors.

The goal of this activity is to understand the medical and mental health comorbidities found in 9/11 responders and survivors.

Upon completion of this activity, participants will be able to:

- Identify the groups of individuals affected by the 9/11 terrorist attack and environmental disaster and their range of exposures
- Describe acute and longer-term aerodigestive and mental health impacts on populations exposed to the WTC disaster
- Describe the benefits of a patient-centered, multidisciplinary program in managing 9/11 exposurerelated medical and mental health comorbidities.

Credits Available

Physicians - maximum of 0.50 AMA PRA Category 1 Credit(s)™

Nurses - 0.50 ANCC Contact Hour(s) (0 contact hours are in the area of pharmacology)

5. Cancer and the World Trade Center Health Program

Elizabeth M. Ward, PhD; Michael A. Crane, MD, MPH; Mark R. Farfel, ScD; David J. Prezant, MD

CME/CE Released: 04/15/2016; Valid for credit through 04/15/2017

This activity is intended for primary care physicians, nurses, hematology/oncology specialists, and public health and preventive medicine specialists.

The goal of this activity is to educate clinicians about the association between cancer and exposure to 9/11 terrorist sites as well as health services the World Trade Center Health Program (WTCHP) offers survivors and responders at risk of exposure or undergoing treatment for cancer.

Upon completion of this activity, participants will be able to:

- Explain why the WTCHP added cancer to the List of WTC-Related Health Conditions under the James Zadroga 9/11 Health and Compensation Act of 2010 (Zadroga Act)
- Recognize what cancers and screenings are covered by the WTCHP
- Identify the process for determining the WTC-relatedness of a disease in a patient with cancer suspected to be due to WTC exposure

Credits Available

Physicians - maximum of 0.50 AMA PRA Category 1 Credit(s)™

Nurses - 0.50 *ANCC Contact Hour(s)* (0 contact hours are in the area of pharmacology)
