

ZIKA CAN PASS THROUGH SEX

Has your partner been to an area with risk of Zika (red and purple areas on the Zika map)?

If yes, use condoms every time you have sex.

Couples who are pregnant:

Use condoms or don't have sex for the entire pregnancy.

All other couples:

If the female partner traveled, use condoms or don't have sex for 2 months.

If the male partner traveled, use condoms or don't have sex for 3 months.

This is very important if you are pregnant.
